

SCANIA ACCESSORIES

2018 EDITION

SCANIA

MAKE IT YOURS

No one is prouder of their new Scania than you, so why not add that little extra stamp of personalisation using the broad range of Scania Accessories. Across Europe, Scania customers love to add a personal touch to their vehicles and we think it is time Australian customers followed suit. So, we are making a huge collection of Scania Accessories available to you, from sheepskin seat covers (Australian-sourced, naturally), a built-in microwave or electric kettle on the inside, to a selection of light bars with super bright LED spot and driving lamps for the front and back of the truck, not to mention shiny hub and wheel caps.

These are all Genuine Scania products, designed by Scania and made for Scania, and all can be fitted by your local dealer. Scania Accessories add convenience, comfort, peace-of-mind and that final touch that says “IT’S MINE”!

SAFETY & SECURITY

ON THE MOVE FOR SAFER RIDES

Regardless of weather or road condition, your truck must present flawless performance every hour you spend with it. Explore our range of safety accessories and other equipment that makes your Scania truck safer than ever. In addition, the extended range of lighting accessories enhances safety by providing several opportunities for improved visibility, ensuring that both you and others on the road are presented in the best light.

Aurum lowprofile, fully equipped, amber LED warning system - 1778 mm

Modern, low profile full LED roof mounted warning system. Width 1778 mm (70 inches). This size fits perfectly on the roof rails of the New Generation Scania. Fully equipped, with amber LED's in all positions. Orange top plate. Easy wiring connections and installation. 24 V. Standard brackets included. Approved to ECE R10 & R65 regulations. (Use 4 x roof rail bracket p/n 2439366 for mounting in new roof rails).

STYLING

DESIGNED TO MATCH YOUR TASTE

We know all our truck owners and drivers have a soft spot for styling equipment. We know we do. And while you are busy saving fuel and driving comfortably – why not do it with style? Our styling solutions will not only strengthen your personal statement. You will also be more relaxed and satisfied in a truck that is more pleasing and better looking. A place that feels like you, like home.

A close-up, low-angle shot of a dark-colored car. The image focuses on the side mirror and the window frame. The mirror reflects a bright, sunny outdoor scene with a clear blue sky and some greenery. The car's body is dark, and the window glass is visible, showing some reflections. The overall composition is clean and modern, emphasizing the car's design.

EXTERIOR ACCESSORIES

Bycool SLIM

The Bycool SLIM has a lower height profile compared with the Bycool Compact 1.4 or Bycool Compact 3.0. Its design is also more aerodynamic, making it even easier for you to reduce your fuel consumption. The Bycool SLIM is a 1400W cooling system driven by an electric compressor. The unit is suitable for dual battery systems. The part number includes the pre-fitted unit, cable harness (does not need to be used if cable prep. FPC5168B has been preselected) and parts for reinforcing roof-mounted wind deflectors, for example, as it needs to be cut to size in order to fit with the cab cooling. The dimensions of the Bycool SLIM are (LxWxH mm) 896x874x116 mm, and it weighs about 34 kg. When installed, the unit adds an extra + 144 mm or so to the height of your vehicle, which means that it is necessary to measure the total cab height with the cab cooling fitted so as not to exceed any height restrictions. Please download Mounting instructions, Spare parts list and User manuals at <http://scania.dirna.com/>
